ABOUT ME

I'm Victoria Bian, a UX designer and developer currently studying Cognitive Science and Human-Centered Design at University of California, Berkeley. I am passionate about new technologies, products and ideas. I love playing around with layouts and colors to create simple and intuitive interfaces.

EDUCATION

University of California, Berkeley
Berkeley, CA | 2013-2017

Web Development: HTML5 • CSS3 • Sass • JavaScript • jQuery • Ruby on Rails
Programming: Python • Java • Swift • iOS
Personal: French • Photography • Typography • Hand Lettering

DESIGN EXPERIENCE

Undergraduate Researcher - theDesignExchange
January 2015 - Present
Worked closely with faculty on theDesignExchange research project. Collaborated with lead designers and programmers to design and build theDesignExchange.org, an interactive portal for the human-centered design community. We are working on its recommendation system UI.

UX Designer - Berkeley Innovation
September 2014 - Present
Accepted as a design member to Berkeley Innovation, an undergraduate human-centered design group. Helped design websites and conduct user research for off-campus clients. I am currently working within a group to design the website for CITRIS Robotics.

UI Designer, Developer - Daybox App
November 2014 - January 2015
Designed the user interface and coded for Daybox app, an iOS productivity app that counts down the days that matter to users. It also helps to get small things organized with reminders for recurring events such as monthly rent, paycheck, dues.

Web Designer - CS 10 Web Development Team
October 2014 - December 2014
CS 10 is a fundamental computer science class at UC Berkeley. Its website design hasn't been changed since the first time it was built and lots of students found trouble getting information they need from the website. As a member of the web development team, I worked with TAs to redesign the main page for the CS 10 website.
